

# The VST Guarantee

We are confident in the level of IT service we provide and will work with you until you are satisfied with the results.

## Keep Your Business Running | Full Service IT Support

Since 2012, Virtual Support Tek's has delivered tailored IT services and solutions to small and medium businesses. We are dedicated to providing every client with high-quality IT support.

### IT Services

We provide flat-rate managed IT services to keep your business running smoothly while you focus on growth.

### Virtualization

Virtualization reduces hardware needs and strengthens backup and recovery for better business continuity.

### Networking Support

A misconfigured network can disrupt business operations and frustrate staff, leading to lost time and productivity.

### Website Solutions

Professional website design, updates, security, and reliable hosting for your site and email.

### Business Continuity

Custom recovery solutions with daily-tested backups for quick restores and backup internet to keep your business online during outages.

### Process & App Development

We review your business processes and create technology solutions that streamline operations and improve efficiency.

### Unified Phone Systems

Complete IP phone solutions with unified communications, allowing calls on desk phones, smartphones, and computers while projecting a professional image with on-hold music and menu options.

### Hardware as a Service

Access servers, desktops, laptops, and network equipment for one monthly fee, with all hardware refreshed on a scheduled basis.

### Managed IT Services and Support

Proactive maintenance, patching, and monitoring of your systems with a predictable monthly fee, plus helpdesk and 24/7 support.

# We Protect Your Company from Cyber Attacks

A research-driven approach ensures security tools are effective and cost-efficient.

*Businesses of any size can be protected and scaled with the right solutions.*

## Our Approach of Dealing with Cyber Threats

Layering security across the network, email, and endpoints strengthens overall protection.

Relying solely on default tools like Microsoft security can leave critical gaps. Well-researched solutions and expert oversight are essential because no single provider covers every threat surface. Manual review ensures that alerts are accurate, tools stay properly tuned, and evolving risks are addressed. With an expert guiding and adapting security layers across the network, email, and endpoints, businesses can achieve stronger, more reliable protection.

### Security Software

Researched tools across network, email, and endpoints. — Backed by expert oversight.

### Cyber Warranty & Insurance

Cyber warranties and insurance help reduce financial risk after an attack.

### Cyber Training

Cyber training strengthens employee awareness and reduces the risk of attacks.
